

Well, we didn't win anything this year, but had a few of our own firsts:

First Time we had working Chemical Engineering Units live on site (more than 10 years visiting Worlddidac Switzerland, I have never seen that)

Tassies in and 100% clear alcohol out !

VIPs suitably impressed!

*Heat Pump
working on site !*

First time we got visiting dignitaries to sit on a chair of nails!

Not quite parliament!

*Is that the MEC on those
nails?
.....for a better way to teach*

First time we went for a spin while parked at the stand!

First time we taught Grade 5's how to read a resistor colour code

First time learners soldered their own projects on site.

That is a description of what it does. I want a definition of what it is!

“You have just soldered your own project in 20 minutes – don't let them tell you what you can't do.”
